

TOXICS REDUCTION ACT – Public Summary Report – 2015 Reporting Year Parmalat Canada Inc. – Winchester Plant

A. FACILITY INFORMATION

The Parmalat Winchester plant operates as a dairy product (cheese, butter, milk powder) manufacturing facility. The main facility processes consist of raw material receiving and storage, pre-processing, production and final storage and shipping.

B. TOXIC SUBSTANCE ACCOUNTING

Substances Reported	CAS#	Primary Use/Source				
NPRI Part 1 Substances	NPRI Part 1 Substances					
Nitric acid	7697-37-2	Clean-in-place chemicals				
Sulphuric acid	7664-93-9	Wastewater treatment				
Total ammonia	NA	Control culture growth in product				
Total phosphorus	NA	Effluent discharges to wastewater treatment plant				
PM ₁₀	NA	Pollution control devices, fuel combustion				
PM _{2.5}	NA	Pollution control devices, fuel combustion

C. TOXIC SUBSTANCE REDUCTION PLANNING

Objectives & Targets

Substance	Objectives & Targets	Reduction Option Progress
Nitric acid	While Parmalat Canada Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for the use of nitric acid in CIP systems.	No reduction options to be implemented.
Sulphuric acid	Sulphuric acid reductions will be achieved by reducing the amount of water that is stored in the on-site storage lagoons where the pH rises, requiring the use of more sulphuric acid to reduce the pH prior to discharge.	Due to issues with the efficiency of the wastewater treatment plant, we were unable to implement the steps described in the plan.
Total ammonia	While Parmalat Canada Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for neutralizing agents.	No reduction options to be implemented.
Total phosphorus	While Parmalat has not identified any technically or economically feasible options for the reduction of phosphorus, the facility will continue on-going efforts to reduce the amount of phosphorus that enters the environment and to support efforts to mitigate the impacts of phosphorus in the South Nation Watershed.	No reduction options to be implemented.

Substance	Objectives & Targets	Reduction Option Progress
PM ₁₀	As the substance is the product produced at the facility, Parmalat Canada Inc. does not intend to implement any options to reduce the substance. However, the facility will continue to pursue opportunities to reduce the discharge of the substance to the environment.	No reduction options to be implemented.
PM _{2.5}	As the substance is the product produced at the facility, Parmalat Canada Inc. does not intend to implement any options to reduce the substance. However, the facility will continue to pursue opportunities to reduce the discharge of the substance to the environment.	No reduction options to be implemented.

Annual Report Certification Statement

As of May 26, 2016, I certify that I have read the report(s) on the toxic substance reduction plan(s) for Nitric acid, Sulphuric acid, Total ammonia, Total phosphorus, PM₁₀ and PM_{2.5} and am familiar with its/their contents and to my knowledge the information contained in the report(s) is factually accurate and the report complies/reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
